- 11/120 Public Forum: Erica Clark and Ralph Carpenter reported on the hedgerow survey carried out by volunteers in the village between 2007-11 and had been undertaken on behalf of the Suffolk Biological Records Centre. Analysis of the 238 hedges recorded showed that the village has high counts of species rich hedges (8 or more species). Erica also outlined possible future surveys e.g. linking within history of the area, looking at other features within the parish, such as ponds, etc.

It was hoped that the Parish Council could obtain permission from SCC to enable the distribution of copies of the hedgerow map. Cllr Browning urged that, whilst it might be useful to get the identified gaps in the hedgerows repaired, he recommended the matter be broached with the appropriate farmers to assess their reactions.
